RE: PM 1030
Your Ref PM 81-3
Acyl-Pyrazine Flavorants of
Southwick, Houminer, and Williams

Dear George:

Enclosed is additional information for inclusion in the proposed application noted above. The two examples demonstrate the advantage of heterogeneous reaction conditions.

The inventors plan to prepare heterocyclic flavorants other than pyrazines and I feel that the best approach would be to follow-up with a CIP to cover this aspect as soon as the data is available.

If you agree, please proceed with the application at your earliest convenience.

We appreciate the search and found it most helpful in determining the best strategy for this case.

Very truly yours,

Susan A. Hutcheson
